

# TEAM5 Status Report #14

**Date:** 3/27

**Status Paragraph:** Finished functionality to display user's friends list in a neat way, and created functionality for users to view a short section on events similar to their skills. Profile editing is also now working for users registered in the database.

| Accomplishments   | Notes | Date |
|---|-------|------|
| Edit profile functionality is now working   |       | 3/26 |
| Display the user's friends list in a neat way   |       | 2/27 |
| Create functionality on the user homepage where depending on their preferences, different bartering options will show up. |       | 2/27 |
| Made search by event functional, added to the database  |       |      |
| Added popups to handle adding friends to chats and when user has no chats   |       |      |
|   |       |      |
|   |       |      |

## Plans (for next meeting):

- Review responsibilities and create MongoDB connection
- Ameya
  - Make it so that the one skill is taken from user, in order to query for events.
  - Fix styling for how the events are displayed. Make it look similar to the search page.
  - Limit display to 5 events max.
  - Add/Delete event functionality
  -
- Cole
  - Websocket implementation & responsive data reading
  - Messages improvements and polishing
  - Create endpoint for message requests from other pages

- Tobias
  - Create functionality for users to create skill tags
  - Create functionality to delete skill tags
  - Messaging “exchange” button
  - Unfriend button if you are friends
- Chris
  - Make search by event functional
  - Users and skills in MongoDB, pull from DB
  - Make the message button functional and add profile pics/info to user details
- Andrew
  - User account system for signup and login
  - Account security and password hashing
