The background is a dark blue gradient with various light blue and white elements. There are several stylized fish of different sizes swimming in the upper half. In the lower half, there are wavy lines representing the ocean floor, with some coral-like structures and more fish. Small white dots are scattered throughout, resembling bubbles or distant stars.

PROJECT DEMONSTRATION

The background is a dark blue gradient representing an underwater scene. It features stylized, wavy lines at the top and bottom in shades of blue and purple, suggesting water layers or seabed topography. Several small, light blue fish are scattered throughout the scene. In the lower-left corner, there is a small, light blue seahorse. The overall aesthetic is clean and modern with a monochromatic blue color palette.

THANKS!
