

# TEAM5 Status Report #18

Date: 4/10

**Status Paragraph:** Finished the second homepage (limit display of 5 events, add/delete event functionality, create event functionality, make it so if users have no events added, switch display to show recommendation of events).

Accomplishments	Notes	Date
Limit display to 5 events max		4/9
Add/Delete event functionality.		4/9
Create event functionality.		4/9
Websockets successfully update currently viewed chat when it receives a new message		
Make it so that if users has no events added, switch display to show recommendations of events.		4/9
Make it so that when click on pfp it routes to the person's pfp		4/10
Make pfp actually be the users pfp		4/10
Function that allows you to add a friend		

## Plans (for next meeting):

- Ameya
  - Friend request portion accept/reject
  - Make it so when clicking on messages it will direct to the messaging page for that user.
  - Make view event direct to event.

- Cole
  - Minor bugs:
    - Make user list refresh when a message to a new friend is sent
    - Scroll message view down when new message is received
- Chris
  - Make search by event work for profiles database
- Andrew
  - Login sanitation
- Tobias
  - Final Presentation Slides
