TEAM5 Status Report #13

Date: 3/23

Status Paragraph: We are continuing our assigned MongoDB work. Tobias set up the profiles collection and is going to work on the editing profiles functionality next. During the next meeting, we should discuss whether to combine all user data into one collection record or just keep them separate (profiles, user credentials, etc.).

Accomplishments	Notes	Date
MongoDB set up		3/21
Working connection to MongoDB/getting user's friends list		3/21
Set up profiles collection		3/23
Created a modular popup window for sending messages outside of the messaging tab		3/23
Set up users database for MongoDB, added events to database. Began setting up search by event.	Debating whether or not to use external "skill" api.	3/23

Plans (for next meeting):
- Review responsibilities and create MongoDB connection
- Ameya
    - Display the user's friends list in a neat way.
    - Create functionality on the user homepage where depending on their preferences, different bartering options will show up.
- Cole
    - Websocket implementation & responsive data reading
    - Messages improvements and polishing
    - Create endpoint for message requests from other pages
- Tobias
    - Create functionality for users to create profile tags
    - Create functionality to delete profile tags
    - Create functionality for users to edit profiles
- Chris

- Make search by event functional
- Users and skills in MongoDB, pull from DB
- Pull from an API with more skills/details
- Make the message button functional and add profile pics/info to user details
- Andrew
  - User account system for signup and login
  - Account security and password hashing
