TEAM5 Status Report #2

Date: 2/2

Status Paragraph: We created product and sprint backlogs for the project and pushed them to GitHub. We also created a file architecture on GitHub and established deadlines for the project. Everyone will now begin working on their front-end views.

Accomplishments	Notes	Date
Setup GitHub product backlog		2/2
Create consistent file structure for branches		2/2
Flushed out Project Backlog for the semester		2/2
Finished Sprint Backlog for sprint 1	Split into two major deadlines, each about a week apart (2/10 and 2/15)	2/2

Plans (for next meeting):
- Create drafts for front-end views
- Styling doesn't have to be finished but structure and some basic functionality should be
- Finish creating The

Blockers:
- Project requirements (is react/ proprietary api required?)
- MongoDB implementation (covered in later lectures)

***Notes:**
- Organized project in preparation for individual branches & commits
